

2012-2016 Median Family and Household Income, 5-year Estimate Grays Harbor County

Compiled by the Grays Harbor Council of Governments

	Estimate	Margin of Error (+/-)
Median Family Income	\$ 55,157	+/-2,877
Median Household Income	\$ 44,521	+/-1,713

Source: U.S. Census Bureau, 2012-2016 American Community Survey

Data Set: Tables B19113 & B19013, American Community Survey 5-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.
