Notes:

Population and housing unit estimates are for the entire school district boundary, irrespective the county boundary. Estimates for county parts, can be found on the OFM SAEP website, see above.

Estimates are approximations. Accuracy evaluation for Washington's small area estimates is still in progress. However, based on other evaluations of small area estimates, the error for areas of about 1,000 in population may range from 5 to 15 percent. Variances for smaller areas may be considerably higher. Furthermore, all SAEP estimates are subject to change due to data updates and revisions. Use these data with caution.
